

David Raoof

Frontend Developer

david.raoofz@gmail.com | +201221026369 | Egypt, Giza | [LinkedIn](#) | [Portfolio](#)

OBJECTIVE

I'm a frontend developer, I want to develop myself and to be professional in this field. I have many dreams that I want to implement, and this will only come with hard work and effort

EXPERIENCE

Frontend Development Intern, DevWave

Jul, 2025 – Aug, 2025

- Worked on multiple tasks under tight deadlines to build adaptability and time-management skills.
 - Built a strong foundation in web fundamentals (HTML, CSS, JavaScript) and progressed to modern frontend development using React.js.
 - Gained hands-on experience in working with structured tasks similar to real-world projects.
-

PROJECTS

Techno-Crete | React.js, Tailwind CSS, React Icons, React Slick, Framer Motion

A responsive portfolio website for *TechnoCrete*, a construction company. The site showcases completed projects, highlights services, and includes a contact section for client inquiries. Built with smooth scrolling, clean layout, and animated elements to reflect the company's professionalism.

Vesto | React.js, Tailwind CSS, Framer Motion, node js, Express js, MongoDB, Cloudinary

An e-commerce clothing store website developed as a freelance project for a real retail shop. The platform includes product listings, shopping cart, order management, and user authentication. Features an Admin Panel to manage products, stock status, and orders. Integrated Cloudinary for image storage and built a responsive, user-friendly frontend. Deployed with Vercel

Art Of Spirit | React.js, Tailwind CSS, Framer Motion, node js, Express js, MongoDB, Cloudinary

An online clothing store specialized in selling t-shirts and hoodies. The platform includes product listings, shopping cart, order cancellation with reason submission, and secure user authentication. Features an Admin Panel to manage products, stock availability, and customer orders. Integrated Cloudinary for image storage and built a responsive, modern frontend with React.js. Deployed with Vercel

CRUDS – Product Management App | HTML, CSS, JavaScript

A web app for managing products with full CRUD functionality. Users can add, update, and delete items, with automatic total cost calculations (including taxes and discounts). Data is stored locally using `localStorage`.

- And you can see all these projects by visiting my portfolio, which contains all the projects and links I have worked on: [My Portfolio](#)
-

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript

Frontend Technologies: React, Next js, Tailwind CSS, Bootstrap, Framer Motion, AOS
